

案例一、! [rejected]

git push Video master时失败

git status 产看报错如下，HEAD detached from

```
Administrator@PC MINGW64 /d/Document/Git/Github/Videos ((c92539d...))
$ git push videos master
To https://github.com/zxj0314/video.git
! [rejected]        master -> master (non-fast-forward)
error: failed to push some refs to 'https://github.com/zxj0314/video.git'
hint: Updates were rejected because a pushed branch tip is behind its remote
hint: counterpart. Check out this branch and integrate the remote changes
hint: (e.g. 'git pull ...') before pushing again.
hint: See the 'Note about fast-forwards' in 'git push --help' for details.

Administrator@PC MINGW64 /d/Document/Git/Github/Videos ((c92539d...))
$ git status
HEAD detached from ac10a75
nothing to commit, working tree clean
```

切换回主分支

```
Administrator@PC MINGW64 /d/Document/Git/Github/Videos ((8a36870...))
$ git status
HEAD detached at Videos/master
nothing to commit, working tree clean

Administrator@PC MINGW64 /d/Document/Git/Github/Videos ((8a36870...))
$ git checkout master
Previous HEAD position was 8a36870 Merge pull request #1 from zhaoxj0314/m
Switched to branch 'master'

Administrator@PC MINGW64 /d/Document/Git/Github/Videos (master)
$ git status
On branch master
nothing to commit, working tree clean
```

git puush就OK了

案例二、! [rejected]

- 1 远程库有修改，本地库与远程库内容不一致，无法同步
- 2 解决使用git fetch,同步修改，然后在push

error: RPC failed; curl 55 OpenSSL SSL_write: Connection was aborted, errno 10053

```
Administrator@PC MINGW64 /d/Document/Git/Gitee/open_source (master)
$ git push gitee master -f
Enumerating objects: 108, done.
Counting objects: 100% (108/108), done.
Delta compression using up to 32 threads
Compressing objects: 100% (103/103), done.
error: RPC failed; curl 55 OpenSSL SSL_write: Connection was aborted, errno 1005
3
send-pack: unexpected disconnect while reading sideband packet
Writing objects: 100% (108/108), 645.25 MiB | 1.38 MiB/s, done.
Total 108 (delta 6), reused 0 (delta 0), pack-reused 0
fatal: the remote end hung up unexpectedly
Everything up-to-date
```

错误原因：同步数据过大

解决方式：

```
1 git config http.postBuffer 524288000
```
